

MH3511

Data Analysis with Computer

Information for Project Work

AY 2025/26 Semester 2

Information for Project Work (15%)

Due Date: 12 April 2025, 23:59pm Sunday (Week 12)

- Form your own group of 5 students
- Fill in the form:
https://docs.google.com/spreadsheets/d/19Vt5pP94zSGQclBr1sjf_5hM5noBDI9JfyCFjU5dr28/edit#gid=0
- Download a relevant dataset from public websites.
 - › Eg. Within R package, in the Environment tab, select: package:datasets
 - › Need to have at least five variables, a mix of different types.
 - › Set your objectives: Estimation? Testing? Comparison?
 - › Plot some graphs, check for assumptions, what is the best approach?
 - › Perform analyses.
 - › Conclusion.
 - › Write a report of 15-17 pages, excluding R code and appendix.
- Sample report: “MH3511 Sample Project Report.pdf”

Information for Project Work (15%)

The assessment of the project is based on the following:

- Understanding of the dataset (what the data measure, type of data, etc.)
- Objectives of the project (what are the questions to be answered)
- Checking of assumptions (exploring the data, etc.)
- Performing appropriate tests
- Drawing conclusions (interpretation of results)
- Presentation of information (appropriate tables, plots and figures)
- Report writing

Note: GenAI is allowed to be used to polish the grammar, but it must be explicitly declared how it was done at the bottom of the title page.

Grading Rubric (15 Marks Total)

Category	Criteria	Marks
Understanding of Dataset	Clear description of the dataset, variables, and data types. Justification for dataset choice.	2
Project Objectives	Well-defined objectives and research questions. Relevance to the dataset.	2
Checking Assumptions	Appropriate exploratory data analysis (graphs, summaries). Checking and addressing assumptions.	2
Statistical Analysis	Correct choice and execution of statistical tests/methods. Justification of approach. Interpretation of results.	4
Conclusions	Interpretation of results. Discussion of findings in relation to objectives.	2
Presentation of Information	Well-structured tables, figures, and visualizations. Clarity and readability.	2
Report Writing	Logical organization, coherence, and clarity. Grammar and formatting.	1
